Learning Theories - teacher notes

For the teacher educator. The course guide allots **Weeks 5, 6 and 7** to Chapter 3: Part 1 (Week 5) on behaviourist theories (Pavlov, Skinner), Part 2 (Week 6) on cognitive theories (Piaget, Bruner) and social learning theory (Bandura), Part 3 (Week 7) on constructivist approaches with application activities and review.

Teaching strategies

The guide names lectures, interactive discussion, question-answer, demonstration and case study analysis. This unit is where the case study method earns its keep.

Run the cases as cases. The corridor scene, the star chart, the two poems, Miss Sadia's "good try" and Babar's ninety seconds are not illustrations to be mentioned; they are the unit's evidence. Give each its four minutes of argument before any theory is named, and the theory will arrive as an answer to a question the room already holds.

Demonstrate the conditioning, do not describe it. The two-glasses demonstration belonged to Unit 2; this unit's equivalent is the consequence audit. Trainees who have listed eight real consequences and named what each trains will never again say "negative reinforcement" loosely.

Let the lenses argue. The four-lens activity is the unit's capstone and the guide's own "Application activities & review" slot. Protect the disagreement. A

room that reaches consensus on Amjad in ninety seconds has not used the lenses; it has used the first one named.

Sequencing across the three weeks

Session	Focus	Leave time for
Week 5, first session	Topic 3.1 - behaviourism, both conditionings	the consequence audit in full
Week 5, second session	Topic 3.1 - reinforcement and punishment precisely	the star-chart redesign
Week 6, first session	Topic 3.2 - the cognitive turn, Piaget and Bruner	the two-lessons activity
Week 6, second session	Topic 3.3 - Bandura, models, vicarious reinforcement	the map-the-models activity
Week 7	Topic 3.4 - constructivism, ZPD, scaffolding, the four lenses	the four-lens activity; expect it to overrun

If a session is lost, compress Topic 3.2's table work rather than Topic 3.4's lenses. The unit's whole point is the choice, and a trainee who has met the families but never chosen among them has memorised a menu.

Misconceptions to expect, and how to handle them

"Negative reinforcement is punishment." The most durable error in the unit. The quadrant figure is the cure: make them place the scolding-that-stops

and the scolding-for-calling-out in different quadrants, out loud, until the room flinches at misuse.

"Conditioning is for dogs." Meet it with the corridor scene and the medicine smell

- both from their own schools. The honest concession (it explains only the automatic part) opens the door to Topic 3.2 rather than closing the argument.

"Piaget's stages mean you cannot teach it early." This returns from Unit 2 wearing a new coat. The reply is Bruner's: the stages describe readiness for the symbolic form, and the enactive-to-iconic-to-symbolic route is how you teach anything at any age.

"Constructivism means hands off." The Babar case is the counter: ninety seconds of deliberate, planned, removed help. Ask what Mr Qasim had to know to place those ninety seconds; the answer (the zone, the missing step, the withdrawal plan) is the work the theory demands.

"One theory is right." Usually behaviourism, among trainees trained on reward-and-punish schooling. Do not argue; run the four lenses. The lens exercise converts more trainees than any lecture, because it makes the choice theirs.

Language and access

The unit's key terms are banked in the terminology list (طرز عمل پسندی، ادراکیت،). Keep the Urdu equivalents active in discussion, as in Units 1-2. The consequence quadrant is the one place where English terms are worth insisting on in discussion, because the misconception lives in the English words themselves.

Practical work

The guide's practical component for this chapter is a case-study analysis: **each trainee brings one real classroom episode - a behaviour that appeared**

or changed in a class they know - and the group reads it through all four lenses.

Run it in Week 7 after the four-lens activity. Each trainee writes their episode in five lines on a slip; slips are shuffled and redistributed, so no one analyses their own case. Groups of four produce the four readings, choose a first response, and present the choice with its switch condition. Twenty-five minutes plus presentations.

Assessment notes

The unit's formative work sits in the four topics' [Check your understanding](#) blocks (twenty items across the unit). The [unit-assessment](#) page carries the graded bank with worked responses and rubrics in its final bounded section.

ERQ 5 is the unit's capstone and integrates all four topics by design. It is the same pupil as the Week 7 practical work, so trainees who engaged there arrive with their evidence already gathered.

Tip: select any text on this page first to comment on that specific passage - or leave nothing selected for general feedback.
