addition of whole numbers. The part-of-a-whole picture from Topic 2.1 is the repair.

2. **"Scale by adding."** The recipe misconception (Topic 2.2) is worth a full five-minute demonstration: mix two batches of sherbat, one correctly scaled and one with the sugar merely added, if your training room allows it.
3. **"8 squared is 8 x 2."** Return to the tile grid: an 8-by-8 floor, not an 8-by-2 corridor. Ask the class to draw both; the picture defeats the error faster than the rule.
4. **"The remainder can be dropped."** The vans problem (Topic 2.3) exists to be got wrong once in class so it is never got wrong at a real school event. Let a trainee order 7 vans, then ask the 5 leftover pupils to stand up.

Running the activities

- **The bazaar ledger (Topic 2.1):** include at least one entry that invites a sign error (a loan repaid) so the integer discussion has something to bite on.
- **The marksheet percentage relay (Topic 2.2):** the debrief question is the point - the raw score that looked biggest (42/60) performs worst. Do not reveal it until the groups have committed to a ranking.
- **Tile the courtyard (Topic 2.3):** 12 x 9 metres with 0.5 m, 1 m and 1.5 m tiles gives clean numbers (432, 108, 48 tiles); the waste discussion is where the analysis lives.

Practical work

Group work in the three activities; a group assignment collecting the class's practicum notes into a "school quantities" register (part-used stationery, tiled areas); the individual assignment is the Topic 2.1 practicum task; presentations come from the tiling defences.

Assessment guidance

The bank's traps are deliberate: MCQ-07 and RRQ-06 test the reverse-percentage and add-to-scale misconceptions, and ERQ-5's look-back remainder is the unit's central transfer. When marking ERQ-2, reward the trainees who

notice the two deals tie; noticing an unexpected equality is a stronger quantitative act than computing a difference that was never there.

Practicum links

Trainees collect a stationery entry in fractions/decimals (Topic 2.1), a marks-versus- percentage reporting practice (Topic 2.2), and a tiled-area estimate (Topic 2.3). All three feed Unit 5's data work later, so insist the notes are dated and specific.
