# Ethical and Responsible Use of ICT

Unit 4 taught you to protect yourself and your pupils. This unit asks a different question: not "how do I stay safe?" but "what is the right thing to do?" A teacher who copies a worksheet from the internet without credit, forwards a pupil's photo to a group, or types a careless reply in a parents' forum is not unsafe - they are irresponsible, and pupils copy what they see. This unit covers the four faces of responsible use: citizenship (who you are online), etiquette (how you behave), intellectual property (whose work you use), and plagiarism (how to use it honestly).

## Unit learning outcomes

By the end of this unit you should be able to:

- Explain digital citizenship and its dimensions, and name the rights and responsibilities it carries.
- Apply netiquette rules to email, class chats and forums.
- Explain intellectual property rights, including copyright, and judge when a use is fair.
- Recognise plagiarism in its common forms and apply the habits that avoid it.

## Prerequisite knowledge

Units 1 to 4, especially Unit 4's digital footprint and data protection.

## In this unit

1. [Topic 5.1 - Digital citizenship](#) - who you are online, and what you owe others there.
2. [Topic 5.2 - Online etiquette \(netiquette\)](#) - the rules of written behaviour.
3. [Topic 5.3 - Intellectual property and avoiding plagiarism](#) - whose work it is, and how to use it honestly.

## How to use this unit

Three topics, one arc: identity, behaviour, honesty. Each ends with habits you can adopt the same day. The summative task of the whole unit is a class code of responsible ICT use - start collecting material for it from Topic 5.1 onwards, because every topic feeds it.
