Draft - expert review pending

This unit is complete and passes the platform’s automated checks, but no reviewer has read it yet. Treat its sources and claims with care.

Unit 2 assessment

Unit summary

Purpose, audience and context shape every text. Tone, bias, stereotypes, assumptions and inferences are the features a critical reader identifies. Reading strategies (skimming, scanning, SQ4R, critical reading) are tools that good readers choose according to their purpose. Active listening requires focus, strategy and engagement. Note-taking formats (linear, mind map, Cornell) help you record and review what you hear.

Summative assessment

Multiple-choice questions (MCQs)

1. In this unit's account, "purpose" refers to: *(Remember)* a) the main idea of a text b) why a text was written c) the audience of a text d) the context of a text

2. A reader who wants to decide whether a text is relevant should use: *(Understand)* a) scanning b) SQ4R c) skimming d) critical reading

3. A pupil says, "The text assumes that all parents value education." This is an example of: *(Understand)* a) a bias b) an inference c) an assumption d) a stereotype

4. Which step comes first in the SQ4R strategy? *(Remember)* a) Read b) Recite c) Survey d) Review

5. A news article describes a protest as "a small group of troublemakers". This is primarily an example of: *(Apply)* a) tone b) bias c) inference d)

assumption

6. Cornell notes are characterised by: *(Remember)* a) branches radiating from a central idea b) a divided page with cues, notes and a summary c) headings and bullet points d) a linear sequence of numbered points

7. A pupil reads every word of a chapter three times but remembers little. The most likely problem is: *(Apply)* a) the text is too difficult b) the pupil is using an inefficient strategy c) the pupil has a poor memory d) the text is too long

8. The difference between what a text says explicitly and what the reader infers is: *(Understand)* a) explicit meaning is stated; inference is concluded from evidence b) explicit meaning is implied; inference is stated c) explicit meaning is biased; inference is neutral d) explicit meaning is critical; inference is surface-level

9. Active listening is best described as: *(Remember)* a) hearing without distraction b) listening with the intention to understand c) taking notes on everything the speaker says d) agreeing with the speaker

10. A text that says "obviously, everyone agrees" is making: *(Apply)* a) an inference b) a stereotype c) an assumption d) a tone

Restricted-response questions (RRQs)

1. Explain the difference between purpose and audience, and give one example of each. *(Remember)*

2. A pupil reads a three-page text three times but cannot answer questions on it. Using this unit's account, explain what is going wrong and propose two specific strategies. *(Analyze)*

3. Name the four reading strategies and state when each is most useful. *(Remember)*

4. A text says, "Naturally, everyone agrees that education is important." Identify the assumption and explain why it is an assumption, not a fact. *(Analyze)*

5. Explain the difference between skimming and scanning, and give one example of each. *(Understand)*

6. Describe the six steps of SQ4R in order. *(Remember)*

7. A news article describes a protest as "a small group of troublemakers". Identify the bias, explain what a more neutral description would be, and explain what the original description reveals about the writer's purpose. *(Analyze)*

8. Explain why "listening is a passive skill" is a misconception, and describe two specific strategies for active listening. *(Understand)*

9. A friend says, "Critical reading means finding faults with everything." Using this unit's account, explain what that claim overlooks. *(Evaluate)*

10. Describe two note-taking formats and explain when each is most useful. *(Remember)*

Extended-response questions (ERQs)

1. A teacher gives pupils a textbook passage and asks them to read it. The pupils read every word but cannot answer the questions. Using this unit's account of reading strategies, explain what is going wrong, propose two specific strategies the teacher could teach, and justify each by reference to the purpose of the reading. *(Analyze)*

2. Read the following text: "The government has announced a new initiative to improve girls' education in rural areas. Under the programme, schools will receive additional funding and female teachers will be given priority in recruitment. Officials say the initiative will help bridge the gender gap in literacy." Apply the four moves for analysing a complete text to this passage: identify surface features, identify hidden features, evaluate the writer's choices, connect to your Pakistani classroom context. *(Evaluate)*

3. A pupil says, "I understand the text but I do not know if it is good." Using this unit's account, explain what skill the pupil needs to develop, describe the four moves for analysing a complete text, and apply them to a described short text. *(Analyze)*

4. Evaluate the claim that "critical reading means finding faults." Use this unit's account of purpose, audience, context, tone, bias, assumptions and inferences to argue for or against the claim. *(Evaluate)*

5. **Integrative.** You are placed in a government primary school. A Class 5 teacher asks you to help pupils who can decode words but cannot understand what they read. Using this unit's account of purpose, audience, context, reading strategies and active listening, design a 30-minute lesson that teaches two specific strategies and explains why each strategy works. Justify each choice. *(Create)*

Answers and marking guidance

MCQ answer key

1. **b** - purpose is why a text was written.
2. **c** - skimming is for deciding whether a text is relevant.
3. **c** - the text takes something for granted without stating it.
4. **c** - survey is the first step of SQ4R.
5. **b** - "troublemakers" is a loaded term that favours one perspective.
6. **b** - Cornell notes use a divided page with cues, notes and a summary.
7. **b** - reading without a strategy is inefficient; the problem is the strategy, not the memory.
8. **a** - explicit meaning is stated; inference is concluded from evidence.
9. **b** - active listening is listening with the intention to understand.
10. **c** - "obviously, everyone agrees" takes something for granted; it is an assumption.

RRQ model answers and mark schemes

1. (4 marks) Purpose is why a text was written (1); audience is who the text is written for (1); the purpose example is genuinely about the writer's goal (1); the audience example is genuinely about the intended reader (1).

2. (5 marks) Explains that reading without a strategy is inefficient (1); explains that the pupil is reading passively (1); proposes two specific strategies (e.g.

SQ4R, critical reading) (1 each); justifies each by reference to the purpose (1).

3. (4 marks) Names all four strategies: skimming, scanning, SQ4R, critical reading (1 each up to 4). One mark per correct use case (up to 4).

4. (5 marks) Identifies the assumption: that everyone agrees (1); explains that an assumption is taken for granted without evidence (1); notes that the word "naturally" signals the assumption (1); the reasoning draws on Topic 2.1 (1); the reasoning is coherent (1).

5. (4 marks) Skimming is reading quickly for the main idea (1); scanning is reading quickly for specific information (1); the skimming example is genuinely about overview (1); the scanning example is genuinely about finding specific detail (1).

6. (6 marks) One mark per step in order: survey, question, read, recite, review, reflect.

7. (5 marks) Identifies the bias: "troublemakers" favours one side (1); provides a more neutral description (e.g. "a group of protesters") (1); explains that the original description reveals a hostile purpose or audience alignment (1); the reasoning draws on Topic 2.1 (1); the reasoning is coherent (1).

8. (4 marks) Explains that listening requires active engagement, not just hearing (1); describes two specific strategies (e.g. focused listening, note-taking, overcoming barriers) (1 each up to 2); the explanation is coherent (1).

9. (5 marks) Takes the claim at its strongest (1); explains that critical reading means understanding how a text works (1); notes that evaluation includes judgement of quality, not just fault-finding (1); argues a verdict with reasons (1); the reasoning is coherent (1).

10. (4 marks) Describes two formats (e.g. linear, mind map, Cornell) (1 each up to 2); explains when each is most useful (1 each up to 2).

ERQ rubrics

Each ERQ is marked out of 20 on the four criteria below.

ERQ 1 - Reading strategies for a struggling class

Criterion	Limited (1-2)	Adequate (3)	Strong (4-5)
Analysis of what is going wrong	Asserts the pupils are lazy	Explains that reading without a strategy is inefficient	Explains the difference between decoding and comprehension
Proposal of two strategies	Vague or generic	Specific and practicable	Specific, practicable, and timed
Justification by purpose (Analyze)	**Asserts the strategies work**	**Links each strategy to the unit**	**Shows how the strategy addresses the specific comprehension problem**
Register and clarity	Generic	Refers to the description	Writes for a colleague, defines terms

ERQ 2 - Analysing a complete text

Criterion	Limited (1-2)	Adequate (3)	Strong (4-5)
Identification of surface features	Fewer than three identified	Three identified with evidence	All four identified with evidence
Identification of hidden features	Names without explanation	Identifies with evidence	Identifies and explains what each reveals
Evaluation of writer's choices (Evaluate)	**Asserts a verdict**	**Argues a verdict with reasons**	**Takes the claim at its strongest, then**

Criterion	Limited (1-2)	Adequate (3)	Strong (4-5)
			shows what it leaves out
Connection to Pakistani context	Generic	Refers to the description	Specific and practicable

ERQ 3 - "I understand but I do not know if it is good"

Criterion	Limited (1-2)	Adequate (3)	Strong (4-5)
Explanation of the skill needed	Vague	Names critical reading	Explains the four moves
Description of the four moves	Incomplete	All four named	All four described with evidence
Application to a described text (Analyze)	**Lists features without analysis**	**Identifies features with evidence**	**Evaluates the writer's choices and connects to context**
Register and clarity	Generic	Refers to the description	Writes for a colleague, defines terms

ERQ 4 - "Critical reading means finding faults"

Criterion	Limited (1-2)	Adequate (3)	Strong (4-5)
Grasp of critical reading	Conflates it with fault-finding	Distinguishes evaluation from fault-finding	Shows what each is for and what each cannot do

Criterion	Limited (1-2)	Adequate (3)	Strong (4-5)
Use of the unit's framework	Names the concepts vaguely	Applies at least three concepts	Uses the full framework to argue the point
Evaluative reasoning (Evaluate)	**Asserts a verdict**	**Argues a verdict with reasons**	**Takes the claim at its strongest, then shows what it leaves out**
Quality of example	Generic	Concrete classroom example	The example genuinely illustrates the argument

ERQ 5 - Integrative: a 30-minute lesson

Criterion	Limited (1-2)	Adequate (3)	Strong (4-5)
Quality of the two strategies	Vague or generic	Specific and described	Specific, described, and timed
Justification of the choices	Asserts they work	Links each to the unit	Shows how each addresses the specific comprehension problem
Lesson design (Create)	**Lists activities without structure**	**Has a clear sequence**	**The 30-minute plan is realistic and each activity is justified**
Realism and register	Ignores the constraints	Acknowledges them	The plan survives the constraints: 30

Criterion	Limited (1-2)	Adequate (3)	Strong (4-5)
			minutes, Class 5, government school

Tip: select any text on this page first to comment on that specific passage - or leave nothing selected for general feedback.
